April 12, 2006

To: All Telecommunications Service Providers

The Indiana Utility Regulatory Commission (IURC) conducts periodic surveys of all local exchange carriers, resellers, and service providers offering telecommunications service in the state of Indiana. The purpose of the survey is to enable the IURC to provide the Indiana General Assembly with timely information on the local telephone service industry.

With the passage of HB 1279 and Governor Daniels' signature of the bill into law earlier this year, the Commission is tasked with additional reporting requirements, including additional competitive and intermodal analysis, as well as in-depth examination of broadband penetration in the State. As we continue to move from a regulated to a more competitive telecommunications industry, we take this charge from the Indiana General Assembly very seriously.

In order to fulfill this objective and complete our report in a timely manner, we request that the **IURC Survey** form and/or an electronic equivalent be completed and returned to the IURC Telecommunications Division *no later than May 12, 2006*. All questions should be directed to either Karl Henry at 317-232-5585 (khenry@urc.in.gov) or Joel Fishkin at 317-233-3464 (jfishkin@urc.in.gov).

Thank you for your cooperation and assistance.

A handwritten signature in black ink, appearing to read "David Lott Hardy".

David Lott Hardy
Chairman

Indiana Utility Regulatory Commission
